

# PAINT SHAKER

## PRINCIPLE & FEARTURES

- Operation principle is shake out of paint cans via vertical direction of machine.
- Variable speed from slow to fast.
- Mixing capacity for can volume 5L/18L.
- Power consumption is low.
- Easy operation & Maintenance.
- Low maintenance costs & one-year parts warranty.
- Easy installation in paint shops because it is designed with 220V electricity net.
- PLC programming & Variable Frequency Device are built in control box.

## SPECIFICATIONS

Capacity	Power motor	Mixing time	Weight (kG)	Dimensions L x W x H	Noise dB
Can 5L/18L	250W-90W-1P	1 min - 9 min	200	750 x 600 x 1300	< 70
